\_\_\_\_\_

\_\_\_\_\_

Introduction

Name \_\_\_\_\_ Date \_\_\_\_\_

You will see... different kinds of plants, parts of a plant and a small moment called my first plant!

Small moment

My first plant!

Name \_\_\_\_\_

Date \_\_\_\_\_

One time I planted a mint plant. It had

stem, leaves, roots and a crown. One day, I got to

bring my mint plant home, I showed my mom my

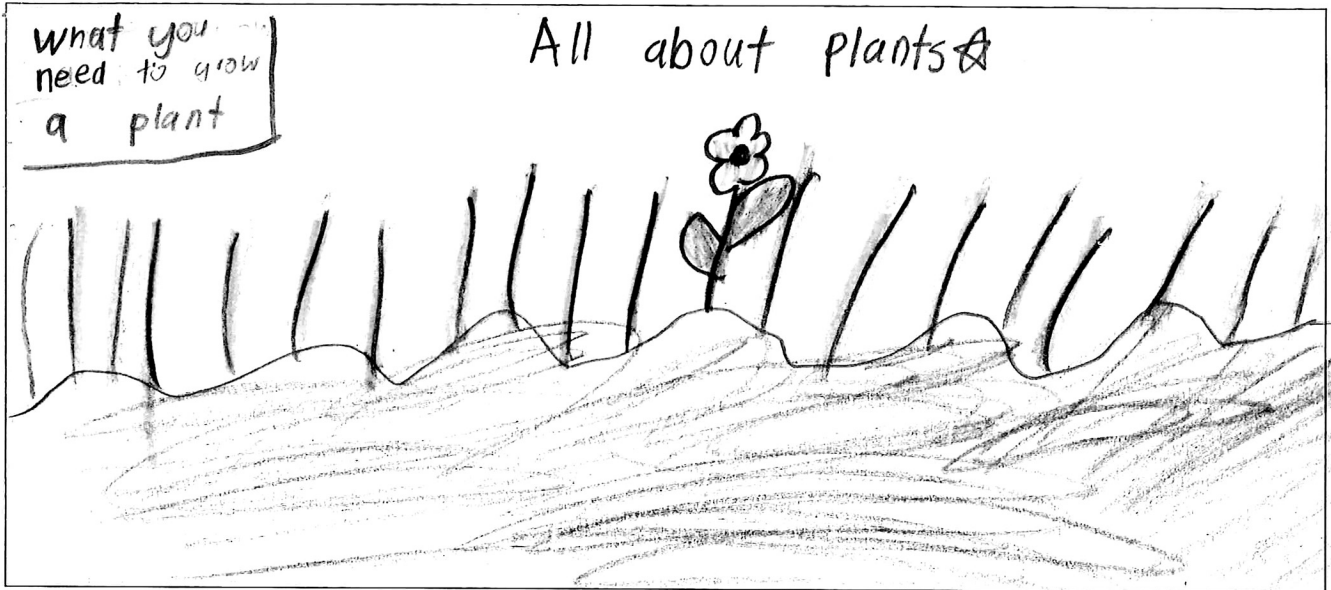

plant she said, 'wow!' I was happy. Then I went to sleep.

I dreamed I bring another plant home.

# Plants

Name \_\_\_\_\_

Date \_\_\_\_\_

! ☆ There are many kinds of plant, but first

for plants to grow you will need: water, soil, sun

and nutrierts. And to grow a plant you will need a

seed (to put in the soil) then water

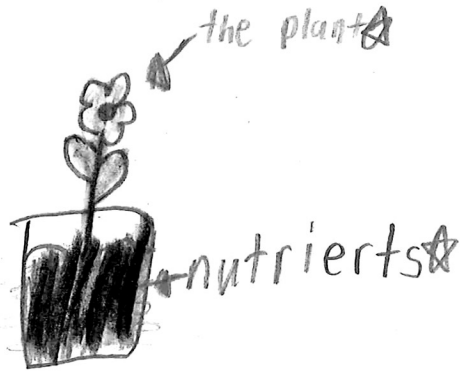

water to the seed (attshaly every-

Fancy.  
expert  
words

some  
-day.)

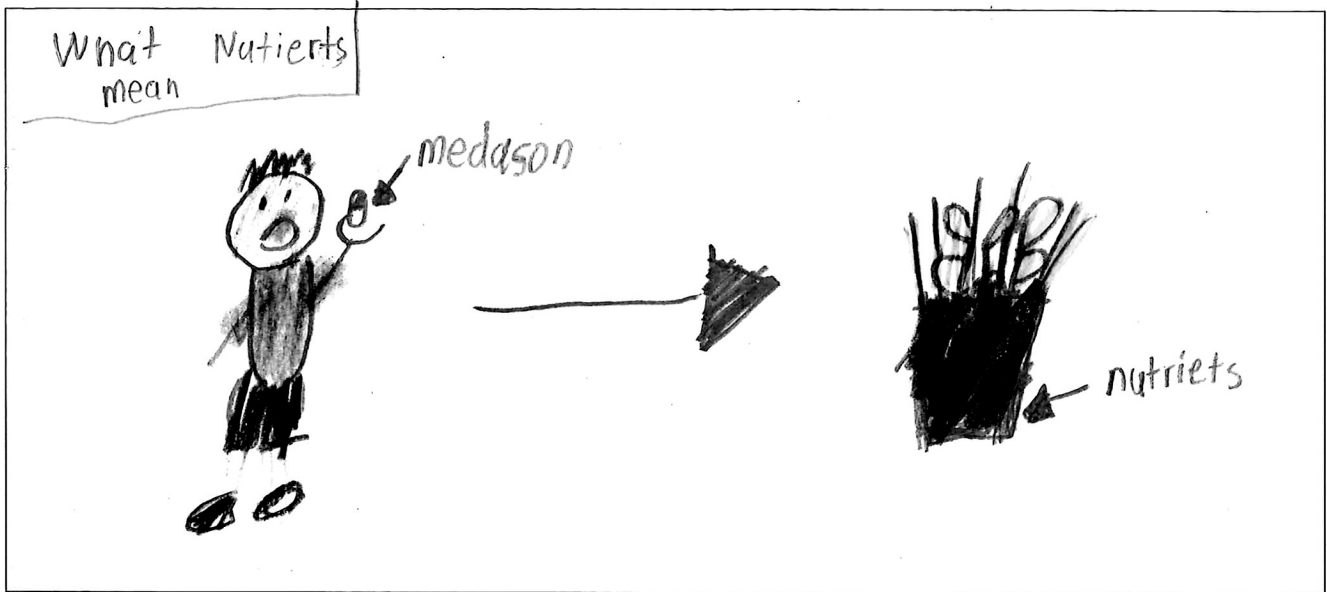

Name \_\_\_\_\_ Date \_\_\_\_\_

Nutrierts

2: Nutrierts are really in the soil. Nutrierts mean like medason, so if you think you have to get a medason and put it in the soil then DON'T EVER DO THAT AGAIN! And you are not supposts to eat the soil too!

Name \_\_\_\_\_

Date \_\_\_\_\_

3:  
 \* Nutrients is the same as pepole eating medason. You  
 don't put a medason inside the soil cause ① they won't  
 eat it! ② YOU ARE WASTING YOU'RE OWN  
 MEDASON!

Name \_\_\_\_\_ Date \_\_\_\_\_

Venus fly trap's

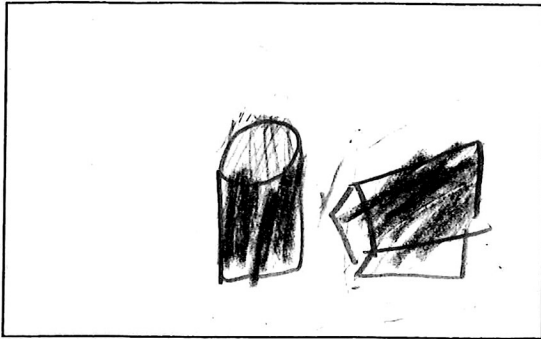

4:

Some plants eat insects so you won't get sting  
or get bother. They are called Venus fly trap. It is hard  
to find it in the flower market. And it is hard  
to find it on the ground too!

A How To  
Book

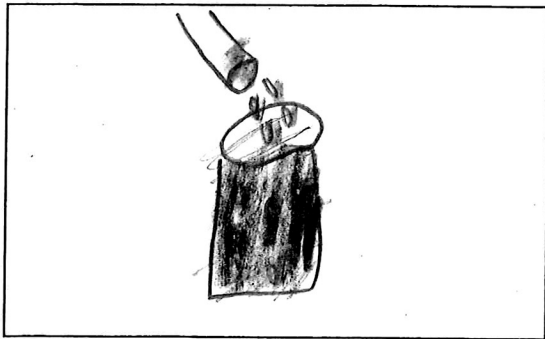

# How to grow a plant

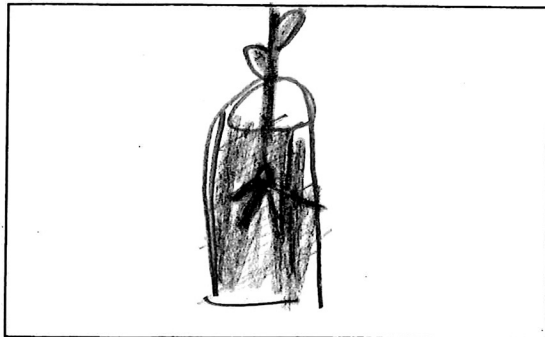

First, scoop a cup of dirt.

Then, sprincaul some seed into the dirt.

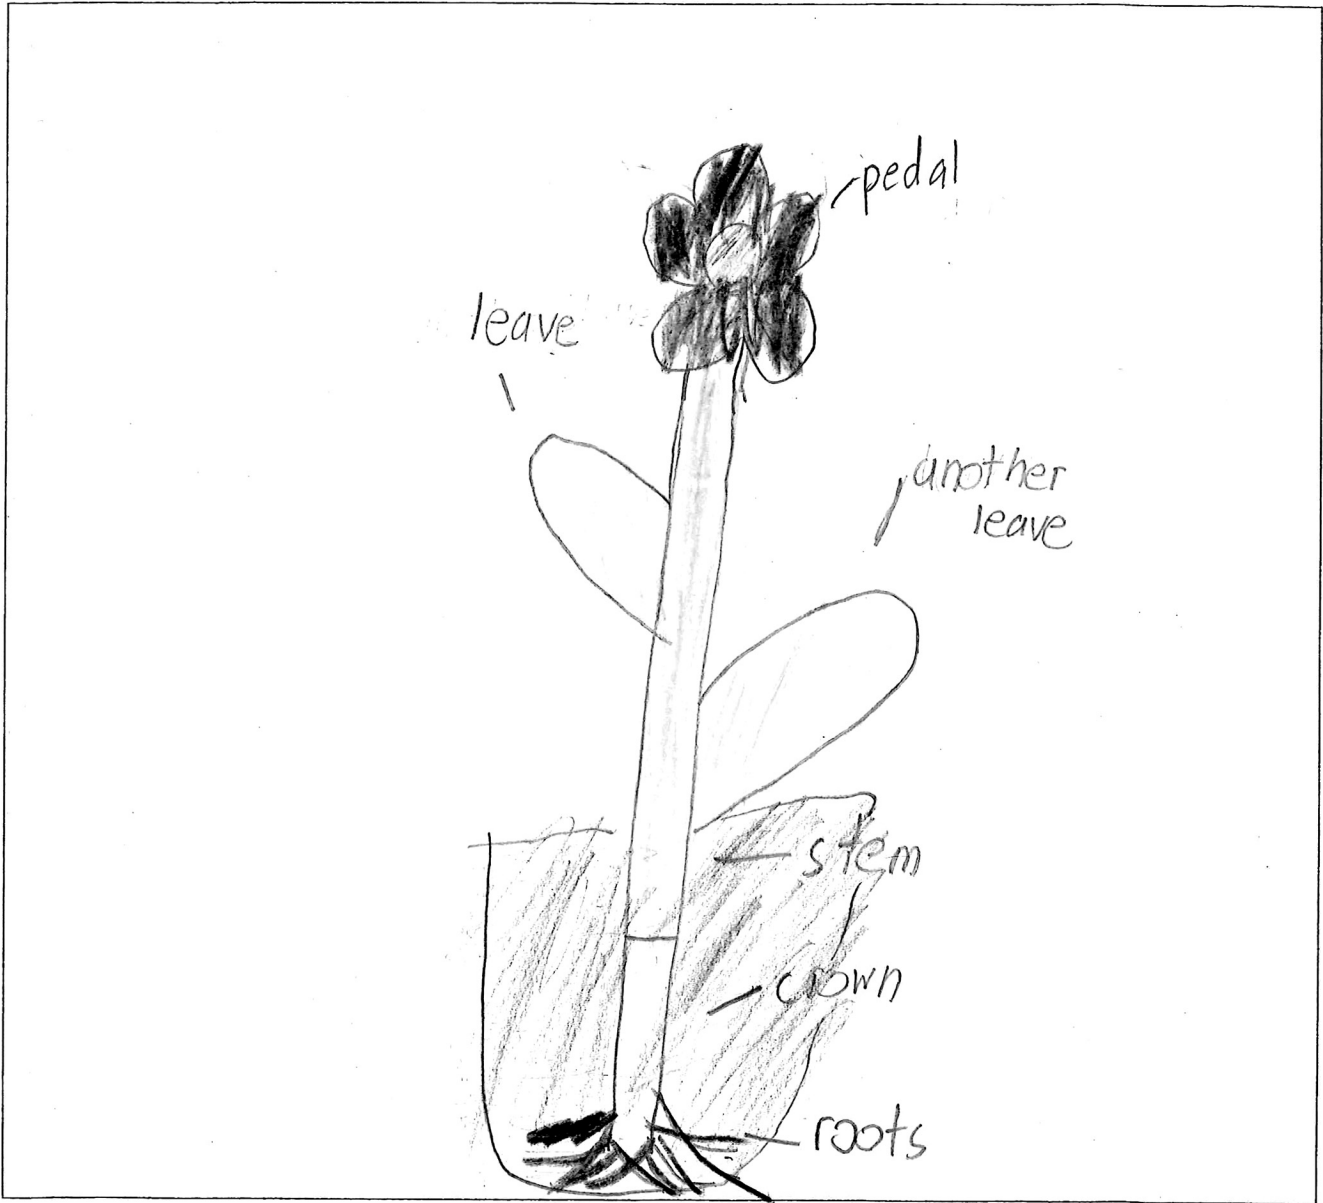

Next, pour water as much like a vile of water.

finally, wait for to grow!

Diagram

A plant has a crown, a stem, some leaves, some roots and maybe a pedal (for a flower.)
