## Introduction

picture you are in a forest and you feel like you are not alone you see something but you don't know what it is. Something breathes it and you hear it and you are a knight sent to slay a dragon now your shaking and feel paralyzed you can't make a sound and you see a dragon right in front of you you get so freaked out you scream the frightened dragon is now roaring and breathing fire and trust me you won't want to be a dragon's dinner because dragons are as big as a whale and has very scary features some dragons wing paralyze humans.

**EXPERT**

What am I?

Hi this is Shen-lung I am here to teach you about dragons. Dragons are a legend they can be pretty nice omnivore, ugly or live in saltwater which almost all dragons die i Dragons are kind of real or fake, most people like parents or teach say dragons don't exist but... no one knows. futs-lung and stig dragon are both controllers of something like me I am the controller of the weather in china.

luckdragon, norweigen ridgeback and hungarian horntail are all from a book or movie these dragons I like to call famous dragons. people say "dragons are never seen" and that's because they are quick, sleek and hunt at night. Dragons can and can't be a good pet if you know how to train him or her once there was a man who found a wyvern and kept him after that no one saw him again.

**EXPERT**

2: where am I?

the next step is to know where they are. Dragons are very quiet but they are very sensitive about their homes because someone who saw a dragon in a cave died from the scary venom. If you see a dragon don't go face to face especially cave. Never go in its cave ever its very protective of its home so never go in its territory. Don't ever go next to a tree they can be on it so watch out. If you see a dragon asleep don't move if you snap a twig the dragon will jump into action which is not that great. A dragon's biggest fear is that you will hurt the dragon, its cave or its land which is also not so good at all so watch out. A mother dragon might have babies if it does don't go even one yard close to the dragon or most likely bite you in the...

NECK!!!

Dragons Don't always use their teeth for eating they also use  
 it for gripping. Some are as long as a ball computer and as heavy  
 as 30 notebooks they can grab and kill prey with them because  
 those danger weapons are called back so their prey can't  
 get out. That dragons teeth are curved back so they can't  
 and if its not big dragons prey is of course big  
 A dragon weighs almost as much as a whale and there  
 claws are so strong they can break it. Their teeth are so curved  
 that the worlds slipperiest and biggest thing a dragon  
 can cling on with its teeth. Eagles talons are just  
 or dragons. A dragon can get trough a dragon  
 and the skin is harder than a rock even eagles  
 can't get close to eagles  
 easy or you will look like this and don't  
 mean don't look like the picture.  
 look like the picture.

Chapter 3 Look at my Sharpeners

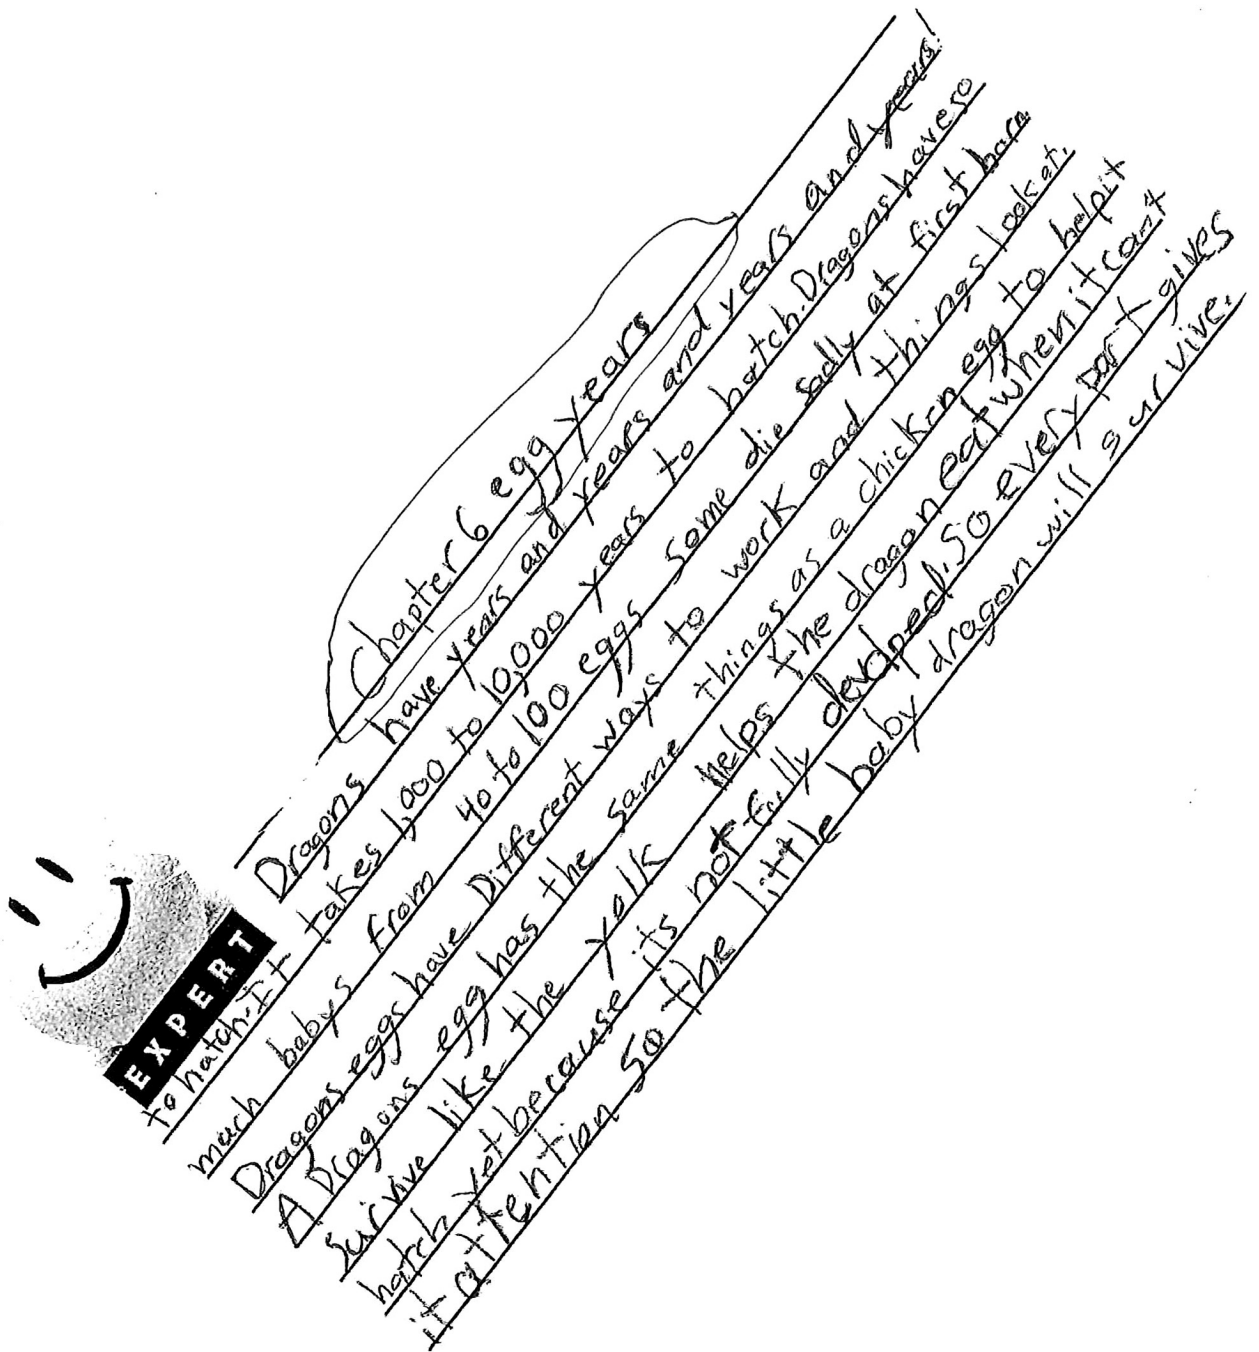

**EXPERT**

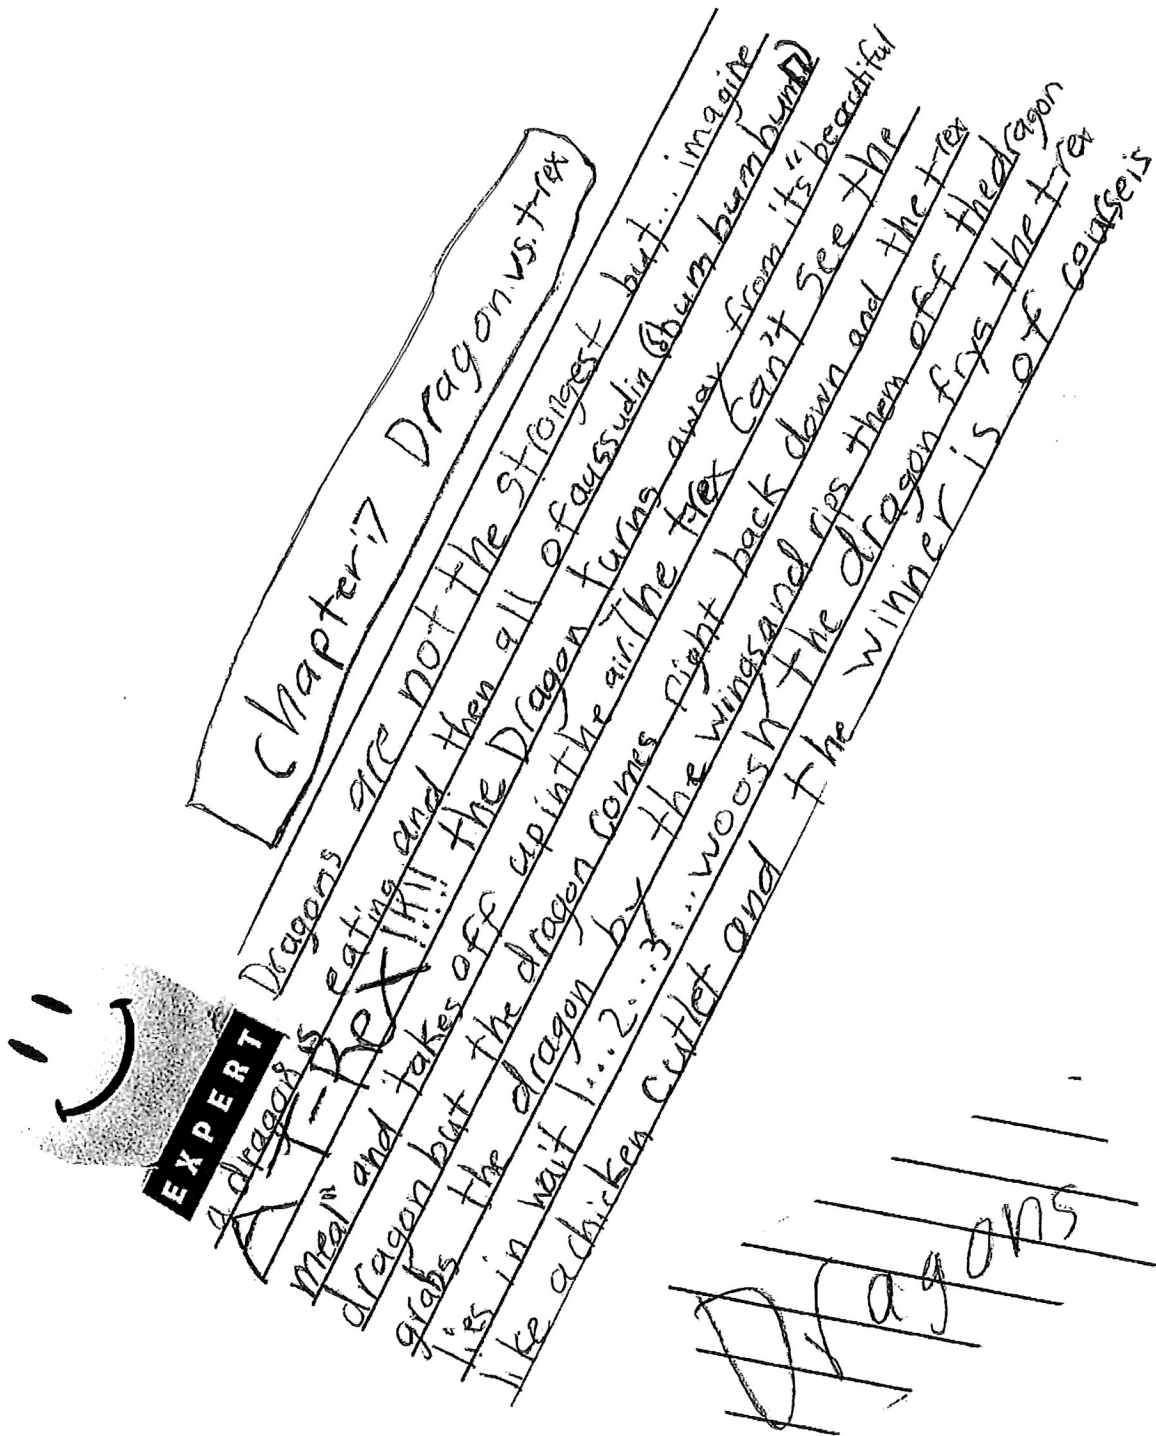

People think dragons are worse. Their fire is about 1000° better than a stove but their flames are not fire and if you in a dragons have that special ability to breath that burning lots of defense systems but the best way is their teeth are really bad. Dragons have a dragon is a reptile winged dragon but the best way is their life of course. A dragon can over power you and when it can burn you it can kill you. Yes and when a dragon can over power you and when it can kill you it can kill you. Kill you wait... maybe I am going to far with this. A dragon can be scared of nervous or and other feelings don't go near it.

4. It's Dark In Here But Not For Long

  
**EXPERT**
  
 Dragons have a great sense for food. Everyone knows that dragons get food from their very best dagger weapons (claws and teeth) and they can help you for a appetizer. They have many things to help get their food. They can hurt them and that is their worst way to help them you can stop them from getting their food and they so you can stop them very easily.

5. Obch food

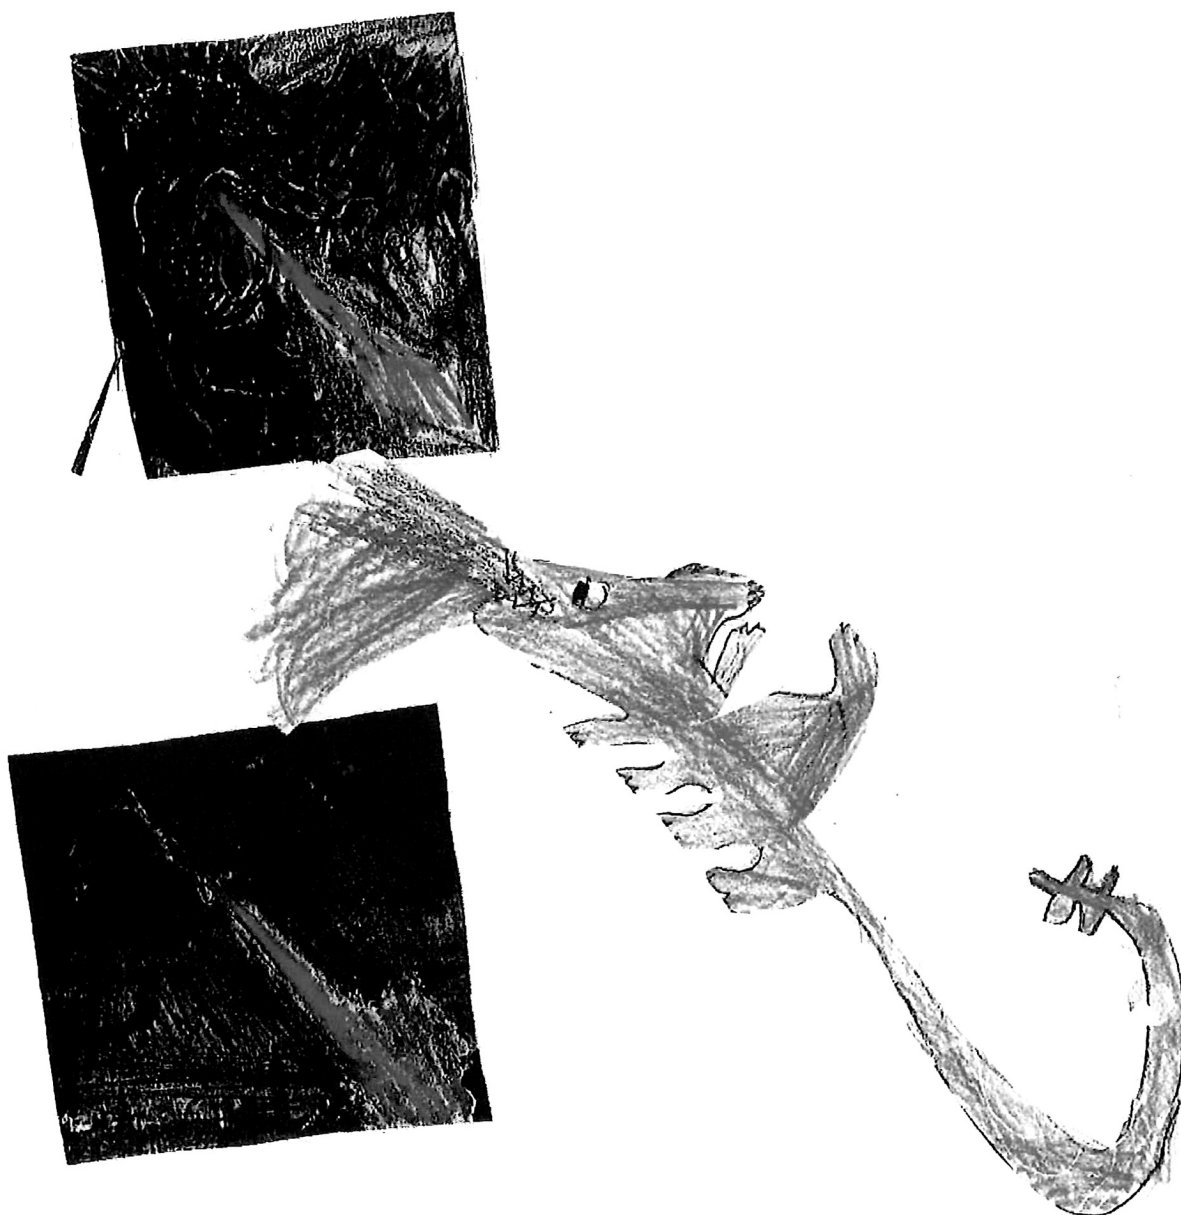

**EXPERT**

Chapter 8: I am famous?  
 but one of dragons have all different kinds of cool stuff  
 ridgeback and bengrain hornail are from a book and movie -  
 luck dragon is from a book so they will become something the world  
 will know for a long time. Dragons special moves or powers that  
 make them famous. One example is Shen-lung. Shen-lung lives in the world  
 the weather. Fu-ts-lung controls volcanic stuff. St. Georges dragon and  
 Fu-ts-lung control water and of course heart lots of people

a: real or fake  
 People think dragons are fake especially adults but others  
 believe in them and when people don't believe in them more and more  
 and more come and china is my favorite country because they  
 believe in all dragons and use them to just express their feelings  
 and dragons kept that stuff. Dragons use themselves to make happiness  
 in state, countries and continents. They use themselves also to express  
 and make happiness so they don't mean to kill or injure people  
 so never get mad at a dragon because they can get  
 madder than you.

## About the author

So who is behind a of this funny chapters  
and great writing it is frank I am  
in third grade and I always make people laugh  
(I love to) also I hoped you would enjoy  
the as much as I love writing  
it.

## glossary

dagger - very very sharp weapon  
cranky - tired and yell or scream as a dragon  
would roar appetizer - little something (food)  
Knight - someone who has metal armor or  
works for a king.

## index

<sup>inside</sup>  
A Apalala p.3  
B Beware Dragons p.5  
C Conclusion p.11 cover p. front cover  
D Different Dragons p.1 and 8  
E every dragon p.1 and 8  
F fofnir p.2  
G Gray grinch p.7

## Conclusion

Its not over! but sadly this is my last page  
I loved writing this book but really I have to go  
I want you to read more books!  
and some are mine. Also read J.K. Rowling  
books they are very good so is harry  
potter witch is by her she is a very  
good author if you think I was  
good read her books they are  
so so soooooo good. I love  
them hope you liked them too.
