Name FrankTopic: Video games

Think about something you know a lot about and write an informational piece that teaches people about your topic.

Today I am going to teach you about video games. First I am going to teach you types of games like the xbox, wii, ds, playstation, psp, gameboy and lots more. Now the rates of games E, E10+, M and T and M are not good kid games they are for teens and adults. Another thing I want to tell you about is the kinds of games like pokeman, halo and much much much more. Also I need to tell you the different controls/controllers. Well each system has a different controller like the xbox doesn't have the same controller as the playstation. Another type of controller is right on the game like ds, psp and gameboy and of course lots more. My next thing is about shapes of games/game discs. A xbox or playstation has a disc a ds or psp not quite because it is a smaller device and can only hold a smaller game. Finally my last thing is dangerous stuff. Do not pour water on any machine at all it will electrify you and that can cause a very sad death... and do not play around with the the wires especially the xbox because it is 110 volts of electricity which is also so very dangerous. That is all I have to say about video games thank you.
