Name MaxTopic: Baking

Think about something you know a lot about and write an informational piece that teaches people about your topic.

Today I'm going to teach you about baking.

First when you start baking you need tools pans, trays, spatulas, bowls, flour, sugar, eggs dough, and icing.

You need to have recipes to make cakes, cupcakes and cookies. You also need sprinkles and chocolate chips.

If you want to make cupcakes here's how you do. So at my dad's bakery if you want to make cupcakes you need dough, icing, sprinkles or chocolate chips. Put flour, dough, and eggs mix for about 30 to 40 minutes. Then take it out and put it in the oven then take it out put sprinkles or chocolate chips on it then the icing then you give it to a person. To make a cake you need eggs, flour, icing and dough you mix it for about an hour then take it but put it in the oven then you put the icing and decorations then then you give it to the person who asked you to make it.
