

Frank lacrosse isn't dangerous it comes with focus and skill

Do you play lacrosse?

Do you like lacrosse?

Do you think it's dangerous?

Well I am going to change your mind and that's definet. My first reason is that you won't get hurt with all of your gear on because once I was playing someone wacked me I didn't feel any thing at all.

All of your gear is thick and strong for example, usually all of your gear is 2 inch which is thick and strong.

Another reason is that it's exciting and fun for example it's exciting and fun because you have to do all ~~crazy~~, awesome special moves which makes it really exciting and fun. Another example is you have to run ~~and~~ make moves which makes it ~~crazy~~ and a pumped up game.

Another reason is you will be changed you will be changed in your playing and feelings and actions because ~~lacrosse~~ lacrosse is a life changing sport because kids tell me "next year I

Frank

will play" they join that year and the lacrosse teams in 2,3,4,5,6,7,8,9,10,11,12 that's how much they love it. My last reason is you will make friends you will definitely make friends because it's along and fun season so that means you will make new friends and see old friends for example, friends will help you, guide you, play with you and much, much more. A friend in lacrosse can take your place.

In conclusion lacrosse is a fun sport it's better then any sport to me really it isn't really dangerous it just have it's just fun, crazy and awesome special moves from it's sportsmanship, crazyness and all of it's fun moves and running my coach says "you a winner in my book always" and "you and everyone on this team will be a winner in lacrosse and your life". Also would you love or like a world without fun sports because that's what the world would be without lacrosse.
