Bugs are AMASING

Buys are AMASTNG

Bugs are amazing. There are more then 600 bug species.

Some not even found yet. And

We keep killing and killing them we can't do that if we want kids in 2020 to see bugs. But did you know if theres about 600 bugs there must be millions of bugs in the world! Scientists are going to rainforests and finding new species to Bugs are AMASING.

THE

Amasing feet. They ants carry grain by grain ALL day in the sun. It's amazing. a tiny creature making a home? Milipedes and centipedes make there homes going in cracks in the wall. And then they hunt at might moving comps into them home. Would you like to be a milipede or centipede? would you like to be a milipede or centipede? would you hugs are amasing.

Bugs defences are amasing all bugs have a defence. Did you know ladybugs nave two defences

There pright colors and spots say go away!

And they let out a disgusting smell from them feet when you get to close. Since I got a box from my friend king Grossman with ladybug larvae and they turned into hadybugs and it was
