

Slow Down on Peninsula Blvd

I think cars should slow down on peninsula blvd because the cars can cause ~~bad~~ accidents. Once I got in a accident and really hurt my head from banging it.

My second reason is that people can be rideing a bike and get run over! Well, if you like bike rideing Peninsula blvd is not the place to be unless your on a side-walk.

Another reason is because people can not care and bump into you at a red light and you can get pushed foward and bump into another car and the other cars can get into the accident to!

One of my ideas to help is to put crossing guards. They can help us and when we need to cross and there is a car coming our way they can help us.

My next idea is to add speed limit signs. Cars go wdy too fast and the car in front could be slow and they can get into a (next page)

car acci'dent. I dont want that
to happen.

The car accidents that
happen can kill people, well, it can
happen alot on peninsula blvd. I
dont want this to keep happening.
The cause of these accidents are
making people move! I dont want
those people to move because then
my freinds will move and I'll have
no one on my block to play with!
This is a bad cause.

Once there was a bad car
accident and a tree fell over! Somebody
could've died because of that. Some people
on my block have dogs and if they
got off the leash and ran into the
street, if their was a crossing gaurd,
he or she could take the dog and return
the dog to its rightfull owner and the
dog would be safe.

We need to stop these cars
from being in danger of having a bad
accident! We should get a crossing
gaurd on Peninsula Blvd to help these
people that are at risk of being
run over by a car! Help these people!
